

Important Safety Information

Sizing Problem with SeaCure Sport Custom Mouthpieces

The Sport model was available in clear, blue and gray

These SeaCure Sport mouthpieces do not properly fit these regulators:

- **Sport I and Atomic regulators** manufactured in 2005 and thereafter (orifice measures 1-7/16 x 13/16)
- **Sport II / Professional Sport and Cressi-sub Ellipse regulators**
- **Sport II and Zeagle regulators**

Stretching due to improper fit may cause the yellow insert to dislodge and enter the regulator which could create a breathing problem

Stop using these SeaCure Sport custom mouthpieces immediately if you have a newer Atomic regulator, a Zeagle or a Cressi-sub Ellipse regulator and contact us for a free replacement Hi-Flow custom mouthpiece.
